

## Appendix 3.

### Precomposed characters in the new Finnish keyboard layout specification

Draft 2006-06-29

**The following characters consist of base characters and diacritics or stroke modifiers, and they are encoded in their precomposed form in the basic mode. In this mode the diacritics are entered as dead letters prior to the base character.**

**In the decomposed mode they and all the other combinations of base characters and diacritics are entered so that the diacritics follow the base character. The stroke modifier, however, acts as a dead key in the decomposed mode, too.**

<i>Code pos.</i>	<i>Key/base</i>	<i>Character name</i>	<i>Glyph</i>
